

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the City of Haverhill. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2004.

Residents of the City of Haverhill

Characteristics of Admissions

In FY 2004, there were 102,226 admissions to licensed substance abuse treatment services in all of Massachusetts; 0.8% (850) of these admissions reside in the City of Haverhill. 2.8% (24) of admissions from the City of Haverhill were under 18 years of age. **Please note that these statistics represent only admissions, and can represent a figure larger than the actual number of individuals.** In FY 2004, admissions to all residential and outpatient substance abuse treatment services from the City of Haverhill reported the following characteristics:

- 65% were male and 35% were female.
- 56% were between the ages of 30-49.
- 83% were white non-Latino, 2% were black non-Latino, 14% were Latino, and 2% were other racial categories.
- 63% were never married, 14% were married, and 23% reported not to be married now.
- 30% had less than high school education, 50% completed high school, and 21% had more than high school education.
- 36% were employed.
- 9% were homeless.
- 40% had prior mental health treatment.

Primary Substance of Use

At admission clients identify a “primary drug” of use which is the substance currently causing them the most problems. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the City of Haverhill.

Table 1					
Primary Drug by District and State FY 2004					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
City	43%	30%	12%	7%	2%
State	43%	39%	5%	4%	2%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Number of admissions Reporting Substance Used: FY 1996 – FY 2004							
City of Haverhill							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '96	746	566	214	212	148	237	185
FY '97	733	531	216	167	133	233	198
FY '98	692	490	212	141	88	236	195
FY '99	832	578	268	216	146	347	277
FY '00	877	617	263	200	139	290	216
FY '01	922	669	279	176	90	283	208
FY '02	826	588	268	148	73	293	207
FY '03	833	587	251	191	87	253	181
FY '04	850	570	247	203	87	278	216

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the City of Haverhill and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
